Introduction

Drybridge Facilitator

The Drybridge Facilitator is a product suite that dramatically simplifies the process of documenting and implementing schema solutions. The Facilitator is available as a local installation, as a hosted web service, or as a turnkey solution. The local installation is available in a demo mode, an ideal environment for you to evaluate the Facilitator's benefits. A document that contains this explanation has either been produced using the demo version or by someone who has been kind enough to help broaden the acceptance of the Drybridge Facilitator, in either case, "Thank you!"

There are several aspects to the Drybridge Facilitator:

- The Documentation Module produces powerful documentation for schemas and schema subsets. The documentation module allows you to create message oriented documentation (for a given root element) or a comprehensive data dictionary for all messages in your environment. Documentation can be produced based on the standard schema or based on modifications that you have made via the Schema Subset Module..
- The Schema Subset Module facilitates the creation of schema subsets that meet your specific business requirements. Easier to use and more powerful than typical XML redefinition, extension, and restriction approaches the subset module helps you to create and coordinate the use of schema subsets with your trading partners while retaining compliance with the underlying schema.

The Drybridge Facilitator simplifies the process of implementing schema solutions by allowing you to easily discuss, update, and annotate your schema and by generating annotated documentation and schema that strictly define your decisions making your development process easier. You can base your documentation on schema annotations included in the base schema and then add your own comments to the documentation.

Drybridge Consulting

Drybridge Consulting offers products and services that make it possible for companies to rapidly deploy connections between trading partners. These services allow our clients to enjoy the cost benefits of short implementation times, easy updates, and reusable code. Drybridge provides the following business integration services:

- XML message design, development, documentation, and deployment
- XML tools and stylesheet development
- Scalable, industrial-strength integration solutions
- · Secure, error-free, and rapid information flow

In other words, Drybridge Consulting helps you to improve the efficiency of your business processes resulting in an improved bottom line. When you see a business process flowchart, think of Drybridge technologies. Think of the nature of the connection. Is it:

- Internal or External
- Business-to-Business or Business-to-Consumer
- Manual or Automated
- Working Correctly... or Broken

Regardless, Drybridge Consulting has the expertise to help you!

Schema Information

Namespace Information

The schemas referenced in this data dictionary use the following namespace prefixes and associated namespaces.

- [blank] http://www.stratml.net/PerformancePlanOrReport
- stratml http://www.stratml.net/PerformancePlanOrReport
- xsd http://www.w3.org/2001/XMLSchema

Schema Information

The following schema files were used in the preparation of this data dictionary.

StratMLPart3++.xsd

- Path Name: file:///Z:/XML Standards/xml.gov/StratML/Part 3+/StratMLPart3++.xsd
- Target Namespace: http://www.stratml.net/PerformancePlanOrReport

Data Dictionary: Drybridge Documentation Facilitator

Acronym

An abbreviation of a proper name usually composed of the first letters of each word in the name.

The Drybridge Facilitator www.drybridge.com

ActualResult

A measurable result achieved on or before a specified date.

(sequence)

The sequence of items below is mandatory. A single instance is required.

SequenceIndicator

SequenceIndicator is optional. A single instance might exist.

An alphanumeric identifier applied to an element to designate its order in a series.

Description

Description is optional. A single instance might exist.

A sentence or short paragraph defining and explaining a concept.

RatingType

RatingType is optional. A single instance might exist.

Definition to be determined.

NumberOfUnits

NumberOfUnits is optional. A single instance might exist.

A numeric value (number) associated with a type of measurement.

StartDate

StartDate is optional. A single instance might exist.

The year, month and day the element with which it is associated is scheduled to begin.

ActualResult 🕻

EndDate

EndDate is optional. A single instance might exist.

The year, month, and day the element with which it is associated is projected to cease, if it is not subsequently extended. Typically the end of a calendar or fiscal year.

AdministrativeInformation

Useful information that is not essential and thus not part of the core of the plans or reports.

(sequence)

The sequence of items below is mandatory. A single instance is required.

Identifier

Identifier is optional. A single instance might exist.

A string of alphanumeric characters by which the information contained within an element is distinguished from other versions of the same information as well as information contained in other instances of the same element.
